

## **Sports Park Design and Management Services**

**(Currently Underway)**

### **Sports Park Design Development**

On June 1, 2010 the City Council approved a request for proposal for Sports Park Design Development Services. The services will provide the final Sports Park Design and Improvements, which include sports fields, restrooms and concession stands, sports fields lighting, sports courts, playgrounds, parking lots, landscape and irrigation improvements. This contract will also include architectural and construction plans for a 25,000 square foot recreation center. Proposals for these services were received by five consultants and formal interviews were conducted. The City Council awarded a design contract to RJM Design Group, Inc., at its meeting on September 21, 2010.

### **Construction Management Services**

On April 20, 2010, the City Council approved a request for proposal for professional Construction Management Services for the purpose of securing a professional construction management team to oversee the construction of the Sports Park. The construction manager's role will be to coordinate the various design elements of the sports park by overseeing and examining the design team's construction plans to ensure that the final Sports Park is constructed and can be maintained as a high quality and modern sports facility. The construction manager will oversee all aspects of construction, through its management of multiple contractors, providing cost and schedule control, assisting the City with evaluating bids for construction and managing the day-to-day construction site operations. Four proposals for these services were received and after an evaluation process was conducted the City Council at its November 2, 2010, meeting awarded a construction contract to Griffin Structures.
